Heavy Rain	Heavy Rain	Light rain showers	Light rain showers	Light rain showers	Partly cloudy (night)
Precipitation probability					
80%	80%	30%	40%	40%	20%

Forecast for Wednesday 20 Sep 2023

Weather: Rain, persistent and heavy at times, will continue until mid-morning. Then drier and much brighter conditions will extend east by late morning. The afternoon will see some sunny intervals and a few passing showers. Windy.

Chance of cloud-free hill tops above 800m: Little chance at first, becoming 80% by afternoon

Low cloud and visibility: Poor in extensive low cloud down to 400 to 700 metres at first, although some breaks possible towards the M6. This will lift off the summits from mid-morning onwards with cloud above most summits this afternoon with much improved visibility.

Freezing Level*	2900m	2700m	1800m	1800m	1700m	1600m	1500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gales or even storm force summit winds at first will lead to drenching conditions and slow progress this morning, along with a risk of fast flowing streams. Winds will moderate through the afternoon.

Forecast for Thursday 21 Sep 2023

Weather: Sunny intervals and a few passing showers in the morning. Clouding over in the afternoon and evening with showers becoming somewhat more frequent and heavier for a time. Brisk southwesterly summit winds.

Maximum wind: Southwesterly winds strengthening through the morning, gusting to 30 mph on the tops by afternoon.

Chance of cloud-free hill tops above 800m: 70%

Low cloud and visibility: Mostly excellent visibility with great air clarity. Cloud lowering to 850 metres as showers pass by, this more likely in the afternoon and evening

Temperature: **Valleys:** Plus 6 rising to 16 Celsius
At 800m: Plus 8 Celsius
Freezing level: Above summits
